Savills, the international real estate advisor established in the UK since 1855 with a network of over 700 offices and associates globally.

This report has been prepared to provide a benchmark of occupancy costs of selective prime properties in various cities in Asia, inclusive of rents, management fees and government taxes/rates. Except for the hotel sector, all the costs are quoted on a net floor area basis per month, which is defined as the floor area exclusively allocated to a unit, excluding common areas. As only a small basket of 5 to 10 prime buildings are monitored in each sector, the rental data and occupancy costs reported in this publication might be higher than the average market figures being reported elsewhere. Given varying local market practices, necessary assumptions and judgments are made by our real estate professionals in local offices to achieve comparable results among the different cities.
